Adolescent Health Survey - F

Please help us by filling in this questionnaire.

We are trying to find out better ways of preventing the spread of HIV/AIDS among young people. Your responses are very important to us and will help to keep young people in this country healthy.

**This is not a test and there are no right or wrong answers.
PLEASE BE HONEST IN YOUR ANSWERS. Do NOT give us answers that you think we want. We need to know what young people really think to develop the best programmes to fight AIDS.**

It is voluntary for you to participate in this study. You can withdraw from the study at any time, and you can also skip questions that you find too personal to answer. Please do not write your name on this questionnaire. All the information you give us will be kept private; nobody will know who filled in this questionnaire. Your teachers, neighbours, family and other learners will not see your answers.

Please take your time and answer carefully. In questions where there are boxes, please check the box next to the answer you want to give. If you have any questions, please raise your hand and ask the project staff present in the classroom.

THANK YOU VERY MUCH FOR YOUR HELP!
